

MacPhersons GLYPHOSATE 700 Soluble Granular Herbicide

MacPhersons GLYPHOSATE 700 Soluble Granular Herbicide is a new granule formulation of glyphosate registered in Australia for the control of annual and perennial weeds in forestry, broadacre, pasture and tree and vine crops.

MacPhersons GLYPHOSATE 700 Soluble Granular Herbicide is a high strength product that contains -

- 55% more glyphosate than Liquid Glyphosate 450 products
- 29% more glyphosate than Liquid Glyphosate 540 products

MacPhersons GLYPHOSATE 700 Soluble Granular Herbicide is -

- a 700g/kg GLYPHOSATE Granule, fully formulated with surfactant – *No additional Surfactant or Wetter is required.* *
- based on the highly active Ammonium Glyphosate Salt giving rapid brownout and control of difficult weeds.
- free-flowing, non-dusty and easily soluble in water.
- conveniently packed in bags or cartons - **NO** empty drums or shuttles to be disposed of or returned.
- better to handle – one 15kg bag is equivalent to a 20L drum of Glyphosate 540 which weighs about 25kg
- has excellent rainfastness properties

Pack Options Available

MacPhersons GLYPHOSATE 700 Soluble Granular Herbicide is available in:

- 10kg cartons (60 x 10kg per pallet)
- 15kg bags (45 x 15kg per pallet protected by a bulker bag outer)

Efficacy

MacPhersons **GLYPHOSATE 700 Soluble Granular Herbicide** has undergone rigorous independent, on-farm field testing for several seasons and is now the glyphosate product of choice for many farmers.
